

GloAro Bot — Client Onboarding Checklist

Everything to collect from a client before we can build and launch their WhatsApp bot.

MUST

Blocker — cannot go live without it

OPTIONAL

Nice to have

WE CREATE

Our side, don't ask the client

Ask this first: Is the business WhatsApp number **already in use on the WhatsApp app**? For the official Meta Cloud API the number must be **deleted from the app** first — one number can live on only one platform. If the client refuses, we use the UltraMsg route instead (Section 2B).

1 Company Details

WHAT TO COLLECT	STORED AS	CLIENT'S ANSWER
Company name MUST	company.name	
Short description, 2–3 lines MUST Used in the bot's welcome / about message	company.description	
Official email MUST	company.email	
Website URL OPTIONAL	company.website	
Support phone (with country code) MUST	company.supportPhone	
Logo file or URL OPTIONAL	company.logoUrl	
Sales contact number OPTIONAL	contact.sales	
Membership contact number OPTIONAL	contact.membership	
Franchise contact number OPTIONAL	contact.franchise	
Tenant slug, e.g. <i>acme-foods</i> WE CREATE	Tenant.slug	

2 WhatsApp Channel Credentials

Pick **one** route. 2A is the official one we use for the GloAro office bot.

2A · Meta WhatsApp Cloud API

RECOMMENDED

- Business WhatsApp number — must not be active on the WhatsApp app
- Phone Number ID
- Business Account ID (WABA)
- Access Token — system user with *whatsapp_business_messaging* + *business_management*
- App Secret — verifies the webhook signature
- Webhook Verify Token

WE CREATE

2B · UltraMsg (fallback)

- Instance ID
- Token
- Phone in hand to scan the QR code
- Callback secret

WE CREATE

No Meta account, no number deletion, no 24-hour limit. But **no buttons or list menus** (numbered menus only), and it is an unofficial gateway — bulk messaging risks a ban.

Admin / partner access to their Meta Business

- Manager
- OTP access on the number for verification

Gets: buttons, tappable list menus, templates, delivery status.
Template approval needed for first contact; replies limited to a 24-hour window.

3 Bot Flow Content ← clients underestimate this; get it in writing

WHAT TO COLLECT	NOTES	CLIENT'S ANSWER
Welcome message text MUST	Optional image with it	
Main menu options MUST	Each row: label, emoji, and where it leads	
For each branch — what type? MUST	Info message / question / action (create lead, track order, end)	
Fields to collect per branch MUST	name, phone, email, city, pincode, order id, free text — and which are mandatory	
Closing message after a lead is submitted MUST		
Language(s) OPTIONAL	English only, or Tamil / Hindi too	
Menu style OPTIONAL	Tappable list (default) or reply-with-a-number	
Session timeout OPTIONAL	Default 30 minutes	

4 Lead Handling & Notifications

WHAT TO COLLECT	STORED AS	CLIENT'S ANSWER
Admin WhatsApp numbers to alert on every new lead MUST	<code>notification.adminNumbers</code>	
Turn lead alerts on/off OPTIONAL	<code>notification.enabled</code>	
Lead categories & lead-ID prefix OPTIONAL	<code>LeadCounter</code>	
Google Sheet ID + tab name, if they want lead sync OPTIONAL	<code>sheets.sheetId</code> / <code>sheets.tab</code>	
Order-tracking API URL, if they have one OPTIONAL	<code>bot.orderApiUrl</code>	

If no order API is given, the bot raises a support request instead of showing live status.

5 Dashboard Users

WHAT TO COLLECT	NOTES	CLIENT'S ANSWER
Name, email, phone, role for every person needing login MUST	Role = admin or staff. At least one admin.	

6 Commercial & Operational

WHAT TO COLLECT	NOTES	CLIENT'S ANSWER
Target go-live date MUST		
Who signs off on the flow content MUST	One named person, to avoid endless revisions	
Expected monthly message volume OPTIONAL	Drives Meta conversation cost	
Support hours / escalation contact OPTIONAL		

Minimum to start building: Sections 1 and 3 (company details + flow content). We can begin the flow while the client's Meta verification is still in progress — but **nothing can go live** until Section 2 credentials are in hand.

Collected by (GloAro) / Date

Client sign-off / Date
